Thor

Thomas Riboulet - @mcansky

Ruby Lugdunum 2011

Thor

made by Yehuda Katz (Merb, Rails)

Thor

powers Rails 3 app templates (check github)

Thor

thought as replacement for Rake

Thor

can be used in ruby scripts

Thor

easy tasks/commands definitions

pure Ruby with not too much Make related stuff

Thor

handy methods built for basic stuff

run() , say(), log(), create_file, ...

easy parameters handling !

```
method_option :class, :type => :string, :required => true
def ...
the_class = options[:class]
```

```ruby
class Blah < Thor
  include Thor::Actions
  no_tasks do
    def something
      puts "something !"
    end
  end
  desc "example", "say stuff"
  method_options :old => false
  method_option :name, :type => :string, :required => true
  def example
    say "#{options[:name]} you are old !", :red if options[:old]
    say "hello #{options[:name]}", :green unless options[:old]
    something
  end
end

Blah.start
```
